

WEEK 2

AI Foundations & Copilot Upskilling

From Passion to Product: Creating AI Solutions with Microsoft AI

Week 2 of a 6

This Week's Objective

Research **Generative AI** and pick a **Microsoft AI technology** you're excited about. Get hands-on — experiment with prompts and start building agents (where available) to learn how the tech behaves. As you explore, begin identifying a **problem or passion** you'd like your GenAI solution to address.

Things to Note

Create a GitHub account If you don't already have one — sign up at [GitHub.com](https://github.com)

Using Microsoft Foundry or Copilot Studio? Anything beyond Copilot needs a free student subscription — options to create one include [Azure for Students](#) | [Microsoft Azure](#) or [Microsoft Copilot Studio](#) | [Create AI Agents](#)

Start networking with Microsoft FTEs A big plus for project exposure and for gaining feedback and insights.

Deliverables This Week

Research Paper

1–2 pages on GenAI & where it fits in the Microsoft AI landscape

GitHub Account

Created and ready for your team repository
