

WEEK 3

Problem Research & Ideation

PROJECT THEME

From Passion to Product: Creating AI
Solutions with Microsoft AI

Week 3 of a 6-week
build

🎯 This Week's Objective

With your **GenAI research paper** done, shift focus to the **problem**. Identify a real-world problem tied to a personal **passion or interest**, define who you're solving it for (your **target user**), and start shaping how a Microsoft AI agent could help.

Things to Note

Install Git for version control Set up Git on your machine so you can version and push your work — download at git-scm.com
[YouTube Tutorial](#)

Azure for Students (free) For anything beyond Copilot — Azure or Microsoft Foundry — create a free subscription at [Azure for Students](#) | [Microsoft Azure](#)

Copilot Studio account (free) Building agents? Start a free Copilot Studio account at [Microsoft Copilot Studio](#) | [Create AI Agents](#)

Deliverables This Week

Problem Research (README)

Your passion-driven problem, target user, and solution concept

Git Installed

Version control set up locally and ready for your repo
