

WEEK 4

Architecture & Prototyping

PROJECT THEME

From Passion to Product: Creating AI Agents with Microsoft AI

Week 4 of a 6-week
build

This Week's Objective

With your problem defined, move into **architecture and design**. Map out how your AI solution works — its components, data flow, inputs and outputs — as a **visual diagram**, then start building a **proof of concept** to bring the design to life.

Things to Note

Build visual diagrams Design your solution architecture as a diagram at draw.io

Azure for Students (free) Free Azure / Microsoft Foundry subscription — [Azure for Students](https://azure.microsoft.com/en-us/free/students/)

Copilot Studio account (free) Free account to build your agent — aka.ms/TryCopilotStudio

Add your GitHub to the tracker If you haven't already, add your GitHub username to the team Excel sheet.

Deliverables This Week

Architecture Diagram

A visual design of your AI solution — components, data flow, inputs & outputs

Proof of Concept

An early working build that shows your solution in action
